PROFESSIONAL SUMMARY

Data & BI Analyst with a background in Management, focusing on **Power BI** development, dimensional data modeling (Star Schema, DAX), and **PostgreSQL**. Experienced in commercial sales reporting, plan-fact variance analysis, and SKU-level margin diagnostics across high-granularity transactional datasets.

TECHNICAL SKILLS

- **BI & Database Tools: MS Power BI** (DAX Time Intelligence, Star Schema Modeling, Interactive Dashboards), **SQL / PostgreSQL** (SELECT, Joins, CTEs, Aggregations, Window Functions, Data Verification, DDL Constraints), **Power Query** (ETL Cleansing), Git.
- **Spreadsheets & Presentation: MS Excel** (Advanced Modeling, XLOOKUP, INDEX/MATCH, Pivot Tables, Data Reconciliation, What-If Analysis), **MS PowerPoint**, **Google Sheets**.
- **Sales & Commercial Analytics:** Sales & Distribution Analytics, Plan-Fact Variance Analysis, Point of Sale (POS) Performance Tracking, Regional Market Dynamics, **Portfolio & SKU Analysis** (BCG Matrix, Margin Decomposition), SLA Monitoring.
- **Languages: English** (B2 - Upper-Intermediate / EF SET C1 Certified), **Polish** (B2/C1), **Ukrainian** (Native).

PROJECTS

Retail Commercial & Margin Optimization Analytics | Power BI, DAX, Dynamic RLS | [GitHub Repository]

- Audited unit economics across 1,370 retail orders ($1.92M sales), finding a $21.7K margin leak across 6 unprofitable sub-categories (Tables operating loss: -$7.24K).
- Replaced arithmetic averages with Volume-Weighted Discount % in DAX, identifying a 4.5% discount threshold where orders turn unprofitable.
- Built a single-direction Kimball Star Schema with Zero Implicit Measures and implemented territory-level Dynamic RLS using a disconnected security table.

Omnichannel Retail Cohort & Commercial SQL Analytics | PostgreSQL, Advanced SQL | [GitHub Repository]

- Designed a 3-table analytical data mart with `CHECK >= 0` constraints, handling real-world data issues (NULL discounts, zero-cost warranty replacements).
- Wrote 10 commercial queries using CTEs, window functions (ROW_NUMBER, LAG, DENSE_RANK), and anti-joins to identify lapsed flagship buyers.
- Analyzed repurchase velocity (days to second purchase) and consumable attachment rates (coffee pods vs. hardware) across sales channels.

Enterprise Supply Chain & Risk Intelligence Solution | PostgreSQL, Power BI, Star Schema | [GitHub Repository]

- Consolidated and audited multi-source transaction records analyzing $36.5M across 180.5K+ rows with automated SQL reconciliation checks.
- Modeled an enterprise Star Schema and built data refresh pipelines to ensure reporting consistency across regional markets.
- Built dashboards tracking vendor SLA delivery delays, lead-time variance, and operational bottlenecks.

EXPERIENCE

Commercial Operations Analyst | *Fortis Group* | *Feb 2024 – Jan 2025*

- Consolidated operational data and logs from CRM systems to ensure accurate tracking of client flows and service pipelines.
- Developed regular and ad-hoc performance reports, analyzing operational bottlenecks and exceptions to maintain 99% SLA adherence.

Operations & Reporting Coordinator | *IMBAstaff* | *May 2024 – Jan 2025*

- Maintained event logistics schedules, inventory records, and resource allocation trackers in MS Excel across **30+ corporate events.**
- Enforced strict adherence to project timelines by providing structured status reporting to avoid operational downtime.

EDUCATION

Bachelor's Degree in Management (Spec. Marketing & Sales) | *Vistula University, Warsaw*
Graduated: July 2026 | **GPA: 4.54 / 5.0** | **Thesis Grade: 5.0 / 5.0**

CERTIFICATIONS

EF SET English Certificate – C1 Advanced Level (Reading & Listening, 2026); **Excel: Beginner to Advanced** – Santander (2025)**;** **Power BI** – Santander Open Academy (2025); **SQL (Basic) & (Intermediate)** – HackerRank (2026).
